

CITY OF POCATELLO CLASSIFICATION SPECIFICATION

Senior Programmer Analyst

Department: Information Technology

Reports to: Chief Information Officer

Pay Grade: H14

Date Established: 3/2014

Date Revised: 12/2017

FLSA Status: Exempt

CLASSIFICATION SUMMARY

The Senior Programmer Analyst performs a variety of intermediate level professional, technical, and analytical duties involving conceptualization, design, development, testing, implementation and maintenance of software applications that provide technology-based solutions. The job analyzes business processes and identifies technology-based solutions to issues of a non-routine nature; completes user work requests or specific projects requiring a moderate to high level of detail and complexity; and implements financial controls involving electronic transfers and automated processes for employees to use.

The Senior Programmer Analyst uses independent judgment drawing on previous experience and education to identify and implement solutions to non-routine problems. The job requires knowledge of different databases such as IBM database, DBW SQL, MS Access, and UNIX, and programming languages such as RPG, CL SQL, and Visual Basic. Functional knowledge of software such as Crystal Reports, Cognos reporting software, Qrep, MS word and Excel, Acrobat Professional, and I-Series Programming Development Manager is also required.

The work environment is a department office environment. The noise level is generally moderate.

ESSENTIAL DUTIES AND RESPONSIBILITIES *(illustrative only and may vary by assignment)*

Provides City departments and individual employees with computer programs, training, support, software, and hardware to maximize efficiency and production. Confers with departments and individual employees to determine specific computer and/or program needs and provides solutions.

Develops new software programs and systems to solve City's program and process issues; upgrades existing systems and software to increase efficiency and effectiveness using modern programming techniques; repairs, modifies and expands existing programs.

Maintains and installs City's IT systems and operations including PC installation and maintenance, server maintenance, telephone/data communication systems management, network administration, and specialized software maintenance.

Writes programs allowing City offices to interface with accounting and other financial software used by the City; troubleshoots and fixes day-to-day software and hardware problems and issues; gives software support; assists computer users with computer and software questions; conducts problem research; assists in correcting computer mistakes; answers general computer questions and proposes solutions to assist users.

Transfers data between systems; converts City reports to PDF format for storage on various forms of media (Cd, DVD, Flash Drive, Tape Drives, etc.) for archival and email purposes.
Performs as needed, electronic transfer of payments from utility customers to the bank; makes electronic transfer to bank to cover accounts payable checks to vendors.

Assists City employees with information technology systems. Answers questions, provides information and technical support, and troubleshoots and resolves employee hardware and software problems.

Trains City users in PC hardware and software and related functions through business critical applications, networking, PowerPoint presentations, and other related activities.

Assists IT Department employees in maintaining, troubleshooting, and upgrading computer system support.

Develops programs for computer system operations, management, database management, program management, and system support.

Converts files between computer platforms and system programming languages.

Implements financial controls for electronic financial transactions. Functions as project manager with the City's bank and/or other financial institutions to resolve transaction problems.

Researches, creates, and modifies programs for individual City departments, assisting department managers in purchasing and installing programs.

Researches, learns, and maintains proficiency in new software packages, modifications, and upgrades being used or that may be acquired by the City.

Maintains records, logs, and documents of installations, upgrades, repairs, and system operations.

Performs all work duties and activities in accordance with City policies, procedures, and safety practices.

Performs other duties as assigned. Nothing in this job description restricts management's right to assign or reassign duties and responsibilities to this position at any time.
